OVERVIEW

Detail-oriented BTech undergraduate in Computer Science and Data Science with skills in frontend web development using **React**, **TypeScript**, and **JavaScript**, along with strong programming and problem-solving abilities. Actively learning and building projects using modern web technologies.

EDUCATIONS

Oriental Institute of Science and Technology

B.Tech in Computer Science (Data Science)

CGPA: **8.75**

Bhopal, Madhya Pradesh

Expected Graduation, August 2027

PROJECTS

Jharkhand Tourism Website

Team Project | React.js, Tailwind CSS, Django, PostgreSQL, APIs

- Led frontend development of a tourism portal, creating a high-performance, responsive UI using React.js and Tailwind CSS.
- Integrated Leaflet and Weather APIs to display dynamic, real-time travel information, enhancing user experience.
- Collaborated with the backend team to implement RESTful APIs, ensuring seamless data flow between server and frontend.

Gemini 2.0 Clone

React.js, Google Gemini API

- Developed a responsive AI chatbot web app replicating Google Gemini 2.0 functionality using React.js and Gemini API.
- Implemented dynamic conversational features, including real-time user input handling and simulated AI responses.
- Focused on creating an intuitive and interactive user interface to enhance user experience.

SKILLS

Languages: C+ +, Python, JavaScript, TypeScript

Tools & Platforms: VS Code, GitHub, Git

Technologies/Frameworks: React.js, Tailwind CSS

CERTIFICATIONS

- Introduction to Python – **NPTEL**
- Java Fundamentals – **Microsoft Learn Student Ambassadors (MLSA) Community**
- JavaScript Essentials – **Cisco Networking Academy**
